Abdelrahman Ahmed Mohamed Elsayed Elewah

Ph.D. Student- Electrical Engineering Since January 2020
Ontario Tech University
Mobile Phone: +12899396665
E-Mail: abdelrahman.elewah@ontariotechu.net

Current Position

Full Time	Ph.D. Student	**January 2020**
Organization	Ontario Tech University	
Department	Electrical, Computer, and Software Engineering	
Research fields	IoT - Machine learning	

Experience

Full Time	Teaching Assistant	**January 2014**
Organization	Benha Faculty of Engineering-Benha University	
Department	Electrical- Electronics and Communications Engineering	
Job Description	Handle large classes in learning activities, grading and other administrative activities	

EDUCATION

MSc, Communications Engineering **March 2018**
Benha Faculty of Engineering- Benha University, Benha, Egypt
Title "Multi-modulation Low Earth Orbit Satellite Based on Software Defined Radio"

Subjects in Master:

- Mathematics
- Digital communication systems
- Trend in communication new systems
- Digital signal processing
- Information theory

B.Sc, Communications Engineering **June 2012**
Benha Faculty of Engineering- Benha University, Benha, Egypt

Grade: **Excellent** With **Honor Degree**

Graduation project **Mine detection system**

- Quadcopter installation
- Implementation of tracking system using GPS and GSM
- FPV system "Real time video link" installation
- Implementation of metal detector

List of Publication

[1] A Elewah, A Taman, AA Awamry, M Elbahy "**Mth Root Mth Power SNR MPSK Estimator**", 12th International Conference Mechatronics, Brno, Czech Republic 6-8/09/2017.

The Latest Works on The Machine Learning Field

1- Releasing the RadViz python package that is used in visualizing high dimensional dataset https://pypi.org/project/RadViz-Plotly/
This package was released in 22 of Aug 2020, and it has been downloaded more than 1500 times. Click here to check the downloads' counts.
2- Creating a repository that contains examples that explain how to use the RadViz package, and this repository is connected to the online Jupiter Lab where the users can run the examples without local installation. Click here to check the examples repositories.
3- Taking machine learning courses. Click here to check my certifications

Achievements

One of ICT winners in InnoEgypt incubation program **January 2019**
The proposed idea, Tamra introduces Internet of Things (IoT) plateform

First Place Winner in Mobile Application Launchpad MAL competition
Technology and inovatation track **April 2017**
The proposed idea is replacing the lift buttons with tablet runing Android OS.By another word integrate the lift with android OS.

Teaching experience

Currently teaching courses at Benha faculty of engineering

1- Electromagnetic field theory
2- Object-oriented programming
3- Electronics workshop
4- Computer architecture

Currently teaching courses at Arab Academy for Science, Technology & Maritime Transport-Smart village

1- Digital logic
2- Networks

Previous teaching courses at Benha faculty of engineering

1- Micro-controller
2- Embedded systems
3- Networks

Online Courses

1- Development Hybrid mobile application **December 2017**
   - Learning how to build mobile application using Apache Cordova.
   - Using Android platform as a case study.
   - Dealing with different Cordova plugins.
2- Front End Web development **April 2018**
   - Dealing with Html, CSS and JS files.
   - Learning how to deal with Version Control environment (GitHub as case study).

Technical Skills

programing language

1. C++
2. Embedded C
3. Python
4. VHDL
5. Assembly
6. Arduino c

Simulation program

1. GNU-Radio
2. Matlab
3. Xilinx
4. Proteus

Personal Skills

Languages

- Good Command of Both Spoken and Written English - **IELTS score 6**

GRE score

- Quantitative 160
- Verbal 138
- AWA 2.5

Volunteering

- Volunteer in EED-2009 and 2010 as Public Relations Officer
  "The Egyptian Engineering Day" 1-2 August 2009 Cairo International Conference Center
  "The Egyptian Engineering Day" 2-3 August 2010 smart village
  "The Egyptian Engineering Day" 6 -7 September 2011 Cairo International Conference Center

Soft Skills

- Team work
- Leadership
- Communication
- Self-Motivated
- Presentation
- Negotiations
- Time Management
- Problem Solving

CONFERENCES And WORKSHOPS

IEEE Day, Egypt Section Celebrating its 55th Anniversary
2-October 2010 Ain Shams *University, Egypt*
The event is part of Egypt Section celebrations with its 55th Anniversary:

- Included spoken About IEEE and its activities and Student Branches, GOLD, WIE.
- In addition to technical talks from Industry (Google & Intel & Nile Uni & Vodafone) talking about new emerging technologies

TRAINING

Telecom Egypt **2011**

- Digital Transmission
- Communication Data Network
- Telephone Networks
- Overview of Satellite Systems
- Earth station

Flair systems **2011**

- In flair to student program we start design intelligent traffic system

Industrial Training Council **2010**

- Sensors

Benha company for electronics industries **2009**

- Training on the processes of producing the circuits (one layer, two-layer, multi-layer)
- Training on processes of the Surface Mount Technology
- Study the advantages of using Electronic electricity meters
- Training on the processes of reform the electronic boards

PERSONAL INFORMATON

Home Address 1867 Secretariat Place, Oshawa, ON
Date of Birth 15.5.1990
Passport No A22926846
Nationality Egyptian
